

**Chief Operating Officer of the Company, Mr. Tang Jianhua, and his team visited Suining Wind Power Project to guide the work and greet the staff on site**

From April 30 to May 1, 2020, Tang Jianhua, Executive Director and Chief Operating Officer, visited Suining Wind Power Project to inspect, guide and greet the staff on site. Sun Guobiao, manager of the wind power project department of China Nuclear Nanjing Company, accompanied the inspection.

Mr. Tang Jianhua has inspected the site of 95MW juta blade lifting, 220kV boost station, 85MW mixed tower base site, Suining wind power

project department and other places and made important instructions on the site and operation work. He pointed out that as one of the company's key projects in 2020, the Suining wind power project needs to do a great job in technical quality and safety management. For the wind turbine lifting, ensuring safety is a prerequisite, orderly organization of construction. At the same time, we should speed up the construction of the wind turbines involved in rice paddies, and strive to complete some fan lifting work before irrigation in the rice fields. For the wind turbine in operation and maintenance work that has been connected to the grid, he pointed out the importance to understand the provincial adjustment of the assessment point in order to achieve steady and full load on the basis of the provincial adjustment assessment.

In response to Mr. Tang's instructions, the wind power project department and power plant operations personnel said that they will strictly implement the instructions in order to achieve the project and power generation goals, to ensure projects safety, quality, quantity and schedule.
