

Chairman of the BOD Zhao Yixin and his team went to Siping City for research

On December 16, 2020, Zhao Yixin, Chairman of the Board of Directors of China Nuclear Energy Technology Corporation Limited, went to China Nuclear Siping Water Group Co., Ltd. to conduct research. The chairman of The Nuclear New Energy Investment Company, Nie Hongshuang, the assistant general manager, and the general manager of the China Nuclear New Energy Investment Company, Huo Yuewen, participated in the research.

Accompanied by Du Shaohui, Deputy Secretary-General of the Siping Municipal Government, the research team visited the fourth water purification plant of China Nuclear Siping Water Group. Zhao Yixin pointed out: "First, it is important to deeply understand the history of the nuclear industry, increase the strength of corporate culture construction, carry forward the heritage of the "two bombs and one star" spirit and the

spirit of the nuclear industry, and integrate it into the whole process and the whole field of enterprise construction, so as to guide practice, promote development and help the industry leap forward. Secondly, to ensure the safety of urban water supply, always to produce conscience water, rest assured water as its own responsibility, to ensure the production and life of urban residents and health. Thirdly, we should increase the integration of science and technology, do a good job in top-level design, build an integrated, scalable intelligent construction, and enhance the operation and supervision of water supply business. Fourthly, we should do a good job of corporate publicity, play a good role in various information platforms, fully display the responsibility of enterprises to assume, improve the influence and visibility of enterprises.

During the research, Zhao Yixin met with Guo Lingyi, secretary of the Party Committee of Siping City, and Mayor Hu Bin. The two sides held in-depth discussions and exchanges views on issues of common concern.
