

Zou Mingfang, Chief Accountant of China Baoyuan Investment Co., Ltd. and her team came to China Nuclear Energy Construction Financing Leasing (Shenzhen) Co., Ltd. to carry out special inspection and guidance

On 14-16 April, 2021, China Baoyuan special corrective action working group deputy leader, chief accountant Zou Mingfang led the team to carry out the company's financial capital management system construction and implementation, capital control problems and risks and other aspects of comprehensive self-examination and inspection work. Liu Chunling, deputy manager of Baoyuan Finance Department and Liu Jianrong, deputy director of China Nuclear Investment Finance Department, participated in the inspection.

On April 16, 2021, the audit had the financial system prevention and control reflection meeting, Zou MingFang presided over the meeting. Fu Zhigang, Chief Executive Officer and Executive Director of China Nuclear Energy

Technology Corporation Ltd. and Chief Financial Officer Wang Xiaoyang were all present in the meeting

At the meeting, the inspection team listened to the Shenzhen leasing company on business management and financial work report as well as the company's financial and risk control measures. The team gave full recognition and praise to the current work and gave advice and guidance on the shortcomings. To meet the world-class enterprise's work standards.

Zou Mingfang put forward the following five requirements, one is that the company should improve the political position, establish a "bottom line thinking" and "red line awareness"; Second, we should raise our vigilance in an all-round way, especially in the case of major accidents in the industry;

Third, we should strengthen the implementation of responsibilities, pay close attention to the implementation; Fourth, we should strive for progress in stability and strive for high-quality development; Fifth, we should do a good job in the implementation of rectification, comprehensive improvement of deficiencies, and further improve the efficiency and quality of work.
