

Chairman of the company, Zhao Yixin, met with Vice Mayor Wu Bo of Liaoyuan City and Yang Wei, Executive Deputy Director of the Military-Civilian Integration Office of the Liaoning Provincial Committee.

On July 31, 2020, Mr. Zhao Yixin, Chairman of the Board of Directors of China Nuclear Energy Technology Corporation Ltd., met with Wu Bo, Deputy Mayor of Liaoyuan City.

Mr. Zhao Yixin introduced the management situation of subordinate water plants during the outbreak including strengthening daily monitoring, increasing inspection and testing efforts, and effectively ensuring the safety of water standards for the health and safety of residents in the service area. At the same time, he also introduced the company's investment in projects throughout the country, welcomed Vice Mayor Wu Bo to visit and investigate, and expressed the strategic emerging industries in the field of investment cooperation with Liaoyuan City.

Deputy Mayor Wu Bo said that the Liaoyuan sewage plant bid expansion project effectively realized the discharge of sewage tenders, effectively improved the regional water quality in the East Liaoriver water management played an important role. It not only reflects the company's strong technical and financial strength, but also reflects the strong social responsibility of central enterprises and hope that the project can have a long-term stable operation for the East Liao River governance to make greater contributions. Vice Mayor Wu Bo also said that the follow-up will coordinate the relevant departments to actively cooperate to ensure that the project is completed as soon as possible.

On the same day, Zhao Yixin met with Yang Wei, executive deputy director of the Military-Civilian Integration Office of the Liaoning Provincial Committee and director of the provincial Defense Science and Industry Office in Beijing.

Zhao Yixin comprehensively introduced the company's main industrial situation and development direction. He said that China's nuclear investment should be based on the consolidation and development of existing industrial investment to nuclear scientific and technological achievements transformation and industry incubation investment, strategic emerging industry equity investment and other areas. China Nuclear will fully support the development of the military industry in Liaoning Province in the new era and hopes that the two sides will expand exchanges and cooperation in various fields. Focusing on key industries and achieve win-win results.

Yang Wei said that Liaoning Province is a traditional military-industrial province and is currently in the development strategy opportunity period. To strengthen the integration of resources, highlighting science and technology leadership, there is an urgent need for external investment institutions to participate. Liaoning Province will comb the project according to the key investment areas of China Nuclear Investment and carry out docking as soon as possible. The two sides exchanged views on the investment needs of the province's nuclear technology application industry, the transformation of scientific and technological achievements and the investment needs of strategic emerging industries.
