

Chairman of the Board of Directors Zhao Yixin participated in the online signing ceremony of the epidemic prevention and poverty alleviation project

On February 28, 2020, during the special period of joint efforts to combat the COVID-19 epidemic throughout the country, China Nuclear Investment completed the epidemic prevention and poverty alleviation project settled in Baihe County, Ankang City, Shaanxi--Shaanxi Nuclear Protection Technology Co., Ltd. through a special method of video connection "Cloud Signing" of the Investment Agreement.

This is a precision poverty alleviation project jointly completed by China Nuclear Investment, the Baihe County Government, and various investors. This is also an example of cooperation between the central and local governments to jointly fight the epidemic. Baihe County, Ankang City, Shaanxi is one of the four counterpart poverty alleviation counties of CNNC. In the second half of 2019, in accordance with the Group's overall plan for poverty alleviation, the company conducted in-depth preliminary communications with the

Baihe County Government and relevant investors to jointly discuss the investment of poverty alleviation programs. After the COVID-19 outbreak, China Nuclear Investment responded quickly and efficiently, requiring the fight against the epidemic and the investment in poverty alleviation to continue simultaneously. The innovation to work online with local governments and investors to Communicate, reach consensus, and adjust the product direction in a timely manner is the best aid to the fight. The products produced in this project are urgently changed from home textiles to the production of medical protective clothing and surgical masks. It is estimated that in early March, 300 medical protective clothing per day and 100,000 surgical masks per day can be produced daily. In less than one month, it has completed production preparations such as government approval, workshop renovation, equipment customization, raw material procurement, and employee training. It has created the "central nuclear model" of precision poverty alleviation and created a fight against of the epidemic with "China Nuclear Speed".

Zhao Yixin, chairman of the board of directors of China Nuclear Energy Technology Corporation Ltd., thanked CNC and the government of Baihe County for their support to the epidemic prevention and poverty alleviation project. It is hoped that the ad-hoc team will, in light of the development of the situation, efficiently advance production preparations, strictly control the safety of production and the quality of products, and make contributions to the fight against the epidemic and the fight against poverty. At the same time, it is necessary to further give play to its advantages and responsibilities in order to strengthen production organization and

management, ensure that product quality and sterilization meet the national standards and the needs of domestic and international market. Creating a strong “nuclear protection” brand.
